2516

Quick-Mount Fixed-Angle Bracket for JBL 8320, 8340A and 8350 Loudspeakers

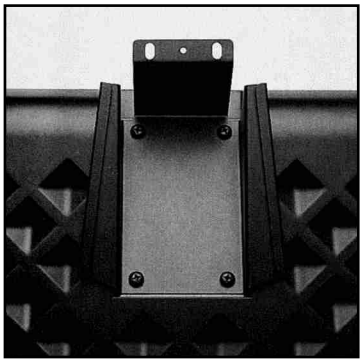

Key Features:

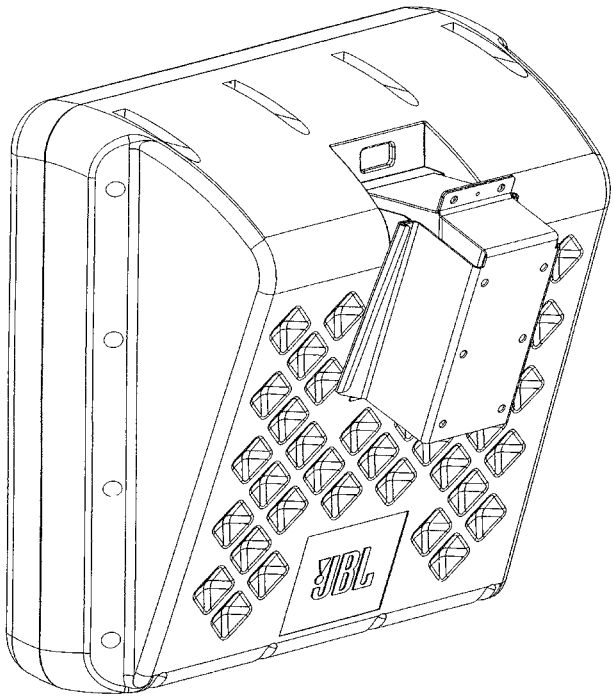

- Designed for JBL 8320, 8340A and 8350 surrounds
- Cost-effective wall-mount bracket
- Two brackets included per a carton

Description:

The 2516 Quick-Mount Fixed-Angle Bracket is a cost-effective means of safely securing JBL 8320, 8350 and 8330A surround loudspeakers to a wall surface. To install, simply fasten the square wall-mount half to the wall and the angled speaker mount half to the rear of the speaker. Slide the speaker over the wall-mount half and secure the top flanges together.

JBL continually engages in research related to product improvement. Some materials, production methods and design refinements are introduced into existing products without notice as a routine expression of that philosophy. For this reason, any current JBL product may differ in some respect from its published description, but will always equal or exceed the original design specifications unless otherwise stated.
