MB12N301

MID - BASS

Description

The MB12N301 is a neodymium, high efficiency, 12” mid-bass. High sensitivity, excellent linearity and very high power handling capabilities. The magnetic structure is powered by a large neodymium magnet that provides an extremely high flux density in the gap. The new hyper-vented aluminium basket and magnetic assembly design provide an excellent heat dissipation and lower power compression. Special air-forced ventilations are provided for voice coil, magnet assembly and basket. M-roll surround and spider design offer great linearity and precise reproduction.

Features

› 3.0-inch, fibreglass inside/outside copper voice coil
› 1000 Watt continuous program power handling
› 98.5dB Sensitivity
› 50Hz –3.0KHz Frequency range
› Dual-forced air ventilation for minimum power compression
› M-roll surround and exponential cone geometry

Part Number

11100071	MB12N301	8ohm
